

Vitalize Logic Library Overview

Easy to access—Easy to use! The Vitalize Logic Library (VLL) service offering allows authorized clients the ability to review our repository of CCL, Rules, etc. over the internet with no obligation to purchase. The intuitive Flash.net application is accessible at your convenience and you may shop independently on-line, review descriptions, example outputs, pricing, mark items for your internal approval process, etc. without sales interference. The VLL is a repository for Eclipsys and Cerner custom reports. You can even review what's new since that last time you visited the repository much like Cerner's PowerChart®. These programs are offered at prices 40-60% below normal custom development costs. Should you want subtle modifications to these, we can easily provide estimates. Contact vcs@getvitalized.com or 610-444-1233 to get your login and password today.

Imagine...positive outcomes for a predictable price realizing a quicker return on your investment.
